

The Simple Solution

Since 1989 we have been offering dealers in the forklift, agriculture, heavy construction, and material handling industries a simple solution to their inventory management and invoicing needs. Softbase provides dealers real-time control over each aspect of their business.

Softbase was designed by people with decades of experience in the material handling industry. Early on, there was a clear need for a solution that gave dealers complete control. We designed the software with simplicity in mind. Operating a dealership is already challenging enough. Softbase was developed to be THE solution. The product we've developed is simple to use, offers a simple setup, and plays a significant role in your dealership's success.

Softbase Offers You:

Real-Time Control

Softbase 3.0 gives you real-time control of all your operations, including equipment inventory, parts, labor, rentals, and financials. Finally, everything you need at your fingertips on one system.

Mobile Maintenance & Management

For your ease and convenience, Softbase offers complete mobile maintenance and management. Armed with tablets, your team can repair and report in live time.

Customer Service & Sales

With Softbase Software, we become an extension of your team and a valuable resource to help your dealership grow.

Softbase offers a solution for industrial equipment dealerships who want to manage their operations and better their bottom line effectively. Whether you are in the material handling industry, agricultural market, or heavy construction industry, Softbase can help you manage and grow your dealership.

For over thirty years, we have become a staple in the material handling industry. Our company has grown largely in part through referrals from our dedicated clients. Time and time again, we have demonstrated our value and have grown because of it.
